

## "R" SERIES LASERS

The "R" series is available in all power levels in both red and green. It uses a remote style power supply (SA-115 -see specifications) that can be easily replaced in the field in case of damage and plugs directly into a standard wall outlet.

This unit is a great choice for Gang Rip saws, or any other application where the unit will be installed in a bank, or in applications where hardwiring into a control is not necessary, but is a great fit and has been used in countless other installations as well.

If you will be connecting to a 3-9vdc source providing your own power to the unit, it can optionally be ordered with an industry standard M12 connector. Just spec M12 after your required model number when ordering. We carry 2m and 5m cordsets if required.

\*Shown with optional SA-008 stationary bracket

### Specifications

Requires a SA-115 PSU

Voltage	3-9vdc
Amps	100ma
Wavelength	Red 635nm Green 520nm

Power levels	5mW (up to 6' line) 10mW (up to 15' line) 15mW (up to 18' line) 30mW (up to 24 line) 50mW (over 30' line)
--------------	---

Size	1.250" (31.75mm) Dia 2.75" (69.85mm) Length
------	--

Warranty	24 month
